

Dongguan Great Innovating Co.,Ltd.

Trusted
Healthcare
&
PPE
Supplier for you!

20 YEARS

total solutions to health care

Company profile

Dongguan Great Innovating Co.,Ltd. established in 1994, is a leading manufacturer of wide range of disposable medical products and PPE products. (Personal Protective Equipments Products) Over the past 20 years, **Great Innovating** has enjoyed unprecedented growth due to the large support of our valued customers.

With three large-scale, modernized production base in China, **Great Innovating** covers a wide range of medical non-woven disposables, PPE coveralls and dental plastics. **Great Innovating** has been distinguished with approval and certifications such as FDA (510K), ISO 9001:2000, ISO 13485:2003 and CE by TUV.

With 20 years of development and experience, **Great Innovating** now serves the following markets of Hospital, Clinics, Dental, Food Services, Industrial Field, Homecare, Government and Consumer markets. Geographically, **Great Innovating** provides its products to nearly every international marketplace with fast growing presence in USA, Canada, Europe, South America and majority of the Asian Countries.

We have well organized facilities and a highly professional train team staff with knowledgeable employees focused on our growing international operations.

We offer integrated support for our clients in manufacturing, outsourcing and developing new medical products. Furthermore, we focus on providing cost effective service, prompt response to inquiries, consolidation solution and offer the most competitive prices, with a focus on uncompromised quality.

We are pleased to offer you our high quality products and competitive pricing, with a commitment to excellent customer service. We are positioned to with our vast intelligence and resources to be your total sourcing solution in China.

Our goal is clear. We want to partner with you to offer cost savings, support and a partnership that will assist both our organization to excel in our business objectives and focused with you as leaders in the field.

- Leading Manufacturer of Medical and PPE Disposables
- Advance automated production and experience.
- About 20 years of professional manufacturing and trading experience.

A smiling woman in a blue surgical cap and gown is the central focus of the image. She is in an operating room, with other medical staff in similar attire visible in the background. The lighting is bright and clinical.

AAMI PB70

Why are more hospitals and purchasing groups choosing **Great Innovating** for their all-around protection?

Our medical products provide the highest protection with the greatest comfort at the lowest cost.

Our medical apparel line includes generously sized footwear, protective headwear, gowns that meet AAMI PB70 requirements, protective multi-purpose gowns, a full range of protective coveralls and comfortable, colorful lab coats and lab jackets.

We know you rely on disposable apparel to keep your staff protected and comfortable. For this reason, we use the finest materials available for protection, offering the greatest level of comfort. We apply the highest quality standards to our products and in our manufacturing facilities.

TUV ISO 13485-2003 certified and FDA Registered,
manufacturing protective apparel for over 15 years.

SURGICAL GOWN BARRIER CLASSIFICATIONS

US MARKET AAMI PB70:2003 & EU MARKET EN13795

WHAT IS EN 13795 ?

EN 13795 is a norm that has been approved by CEN on September 6, 2004 and is acknowledged as the European standard that controls and confirms the crucial requirements of all medical devices such as surgical gowns, drapes and clean air suits, both disposable and non disposable textiles.

Parts of EN13795

1. Basic information for the manufacturers, converters and for the processors such as traceability processes and validation of all steps.

2. Testing methods that evaluate specifications explained on Part1.

For instance;

EN ISO 22610; resistance to wet microbial penetration

EN ISO 22612; resistance to dry microbial penetration etc.

3. Defining the minimum and maximum standards depending on the conditions of the surgical operations.

| EN 13795-2:2004 | |
|---------------------|---|
| EN ISO 22610:2006 | Resistance to wet microbial penetration |
| EN ISO 22612:2005 | Protection against infection agents |
| EN ISO 9073-10:2003 | Assessment of linting and particulate matter |
| EN 1174-2:1996 | Microbial cleanliness |
| EN 13938-1:1999-wet | Determination of bursting strength |
| EN 29073-3:1992-wet | Determination of the breaking strength and elongation |

1. Adjustable neckline on

gowns, colour-coated available for plus information.

2. Raglan or Set-in sleeves provides

different options for greater freedom of movement

3. Extra Long Cotton Knitted Cuffs

Latex-free, keeps the gloves tight and safe on surgeon's hand.

4. Ultrasonic welding on critical parts for excellent protection.

The technology of ultrasonic welding makes the jointing part seamless and faultless, which forms ultimate barrier to fluid and bacteria. Comparing with traditional sewing stitches, it makes the gown more protective and stronger.

5. The 5th Generation SMMMS fabric

Our SMS technology utilizes five layers of fabric to provide a high level of fluid repellency. This helps provide a barrier to blood, body fluids and pathogens, the fabric features three densely-packed meltblown layers sandwiched between two strong spunbond outer layers. Strategy raw material supplier PGI, Ahlstrom, SAAF.

6. Low-linting

All gowns are very low linting, minimizing the risk of introducing particles into the O.R.

7. Latex-Free

All gowns are latex free. All of our packaging is clearly labeled with latex-free symbol for added piece of mind.

High Performance Surgical Gown

GSG80
5-layer anti-static breathable SMMMS fabric with AR+AS Treatment

- High level anti-static treatment
- Excellent microbial barrier
- Excellent physical barrier to contaminants and fluids
- Stronger fabric with a matte finish, resistance to tears
- Softer fabric with comfort inside and outside
- Book fold is available
- Ultrasonic sealed seam or Three thread over-lock Serged seam

SMS Isolation Gown

GSG50

Level 1 and Level 2

Gowns made from multiply medium weight and lightweight SMS material. The Isolation Gowns meet the test requirements set forth by the Association for the Advancement of Medical Instrumentation (AAMI) PB70. Provide barrier protection based on AAMI guidelines and helps reduce the risk of contamination and transmission of infectious organisms which lead to HAIs.

Three-Layer SMS Fabric:

Outer layers-Cloth-like, yet tough and abrasion-resistant
Middle layer-Intricate web of microfibers that filters out many water-based liquids

Easy to wear

The tape tab neck closure makes these gowns easy to put on and take off.

Meets AAMI Levels 1 & 2

The gowns meet the Association for the Advancement of Medical Instrumentation (AAMI) PB70 standard, "Liquid barrier performance and classification of protective apparel and drapes intended for use in health care facilities."

Medium Weight Gown – Level 2

(protection against low levels of fluids)

Lightweight Gown – Level 1

(protection against minimal levels of fluids)

Low-linting

Because these gowns are made from polypropylene, they are low in lint.

LEVEL 2

SMS Impervious Gown

Thumbs Up Fluid-Proof Breathable Gown is styled to prevent sleeves from sliding. Our least expensive impervious, breathable gown is offered in the highly successful Thumbs Up style with the convenient thumb loop preventing sleeves from sliding up when putting on gloves. Reinforced polypropylene-film offers breathability in addition to strength for extended wear periods.

Multi-ply material: The SMS material provides AAMI level 2 barrier.

Features:

1. Over-the-head neck style, open back, Heat seam provides high protection
2. Thumb loop wrists feature elastic for a good gown and glove fit
3. Apron-style neck enables gown to be placed on and off quickly
4. Individually folded and wrapped gowns in dispenser box

Package:

Specially folded and packaged in individual pouches. Includes dispenser box.

APPLICATION

15PC/BOX, 75PCS/CTN

Cat. I^a

Spunbonded Polypropylene Isolation Gown

These protective garments are available in single-layer spunbonded polypropylene for basic coverage or a tri-layer SMS fabric for increased fluid resistance. Each gown features a waist belt and latex-free elastic or knitted cuffs. Choose from either ties or a tape tab at the neck.

Besides, there are Open-back or Full-back optional styles.

1. Basic Polypropylene Isolation Gown
2. Made from lightweight, fluid-repelling polypropylene material
3. Generously sized for full coverage and flexibility
4. Styles available in classic neck and waist ties with elastic wrists or over-the-head with thumb loop wrists
5. Low in Lint

APPLICATION

10PC/BAG, 100PCS/CTN

Cat. J^a

Note: These gowns are constructed of a fabric that offers high fluid protection, yet due to seam construction, the gowns do not meet the AAMI PB70 Standard. For gowns that meet AAMI standards, please refer to front pages.

Standard Polyethylene-Coated Polypropylene Gown

Coated material Made from polypropylene and polyethylene coated together. Choose from two weights: medium weight and heavyweight.

Two options for wrists

The gowns feature comfortable latex-free knit or elastic wrists with neck and waist ties.

Protection from fluids

The gowns provide great fluid protection.

Low-linting

Polypropylene fabric makes these gowns low in lint.

Enhanced Safety and Performance!

Great Innovating offers a wide variety of mask designs, fit and filtration to match the protection needs for each procedure or risk level. The Mask filtration guide makes it easy to select the level of filtration required, including ASTM Level 1, 2 and 3 and N95 particulate respiration. From minimum performance masks for dry, short procedures, to our maximum filtration mask, Isolator Plus, Great Innovating has the right mask for the task!
